How come I don't see the "Re-pull as New File" button on the Credit File screen?

Your **Credit** screen does not have the **Re-pull As New File** button like the one in the picture below:

Submission Results

Bureau	For	Date	OK	Ordered By	Error Message
*** NONE ***					
				Re-pull As New File	

The system does not show this button for reports that are under 30 days old. It is recommended that you do not pull a new file if the current one is not older than 30 days. It usually takes the repositories 30 days to update their database to reflect any new changes. If you must pull a new report, you can just enter the information again and pull a new report from the **New Report** screen.
